

PowerMate LiftGate > vehicle loading machines

Stanley's LiftGate LG-3 and LG-6 vehicle loading machines replace externally-mounted lifts and reduce the risk of injury from manual handling heavy loads. With multiple internal configuration options for a range of delivery vehicles, LiftGate units can be installed in just four hours. Protected from external damage and weather, LiftGate's unique cantilever arm enables bulky, heavy items to be manoeuvred into a vehicle safely and quickly, limiting any manual handling.

Both LiftGate models have either left or right-hand mounting options. The LG-3 unit offers a unique solution for full-sized vans, whilst the LG-6 model is designed for cube or box-style vehicles with 114kg and 227kg weight capacities respectively.

Benefits

- > Unique solution for different vehicles
- > Fast, configurable installation
- > Interior fitment protects against weather
- > Speeds up safe loading and delivery
- > Eliminates item damage when loading
- > Minimises manual handling
- > More cost-effective than hydraulic lifts
- > In-transit power supply
- > Conforms to EC materials handling regulations

Specification

- 225kg maximum capacity
- Heavy-duty steel and aluminium frame
- Articulated arm for manoeuvrability
- Automatic braking system
- End stop override clutch
- Rocker switch operation
- Gear reduction motor
- 12-volt vehicle electrical system
- Adjustable strap bar and cradle attachment
- Protective load felt
- Heavy-duty toe plate
- 72cm lift height and 95.7kg weight - LG-3
- 102cm lift height and 98kg weight - LG-6

- ✔ Free demonstrations
- ✔ Certificated training
- ✔ National maintenance coverage
- ✔ Preventative maintenance schedule
- ✔ Competitive finance and hire options
- ✔ 12-month parts warranty
