Handling your safety

Tolo

mobility stair climber

The Tolo is a comfortable battery-powered mobility unit, which enables users to overcome door thresholds and manage the majority of staircases including spiral, winding and straight stairs. Easy to use and versatile, the powered stair climber is a stair lift alternative, ideal for conquering all your stair climbing needs for general access or in the event of lift failures.

The unit gives freedom and independence to people wanting a mobility solution in their home, work or social life.

A trained individual is required to operate the Tolo during the stair climbing process, which is a straightforward task completed at just the touch of a button. The seat is equipped with foldable armrest, headrest, and adjustable footrest designed to give the passenger the correct body posture and ultimate comfort.
