Stanley offer an extensive range of racking systems to suit all sectors. These vary in size, weight capacity and material, with a portfolio of accessories to choose from.

Fully adjustable galvanised slot-together racking system:

- Avoid scratches and aging compared to painted systems
- Painted beams available for improved visibility
- CE certified for manufactured orders
- Store up to 13500mm in height using a single upright system

Lengths and depths:

- Lengths: 1350, 1800, 2200, 2700, 3300, and up to 3600mm
- Depths: 900, 1000, 1100, and up to 1500mm
- Other sizes available

Beam loadings available up to 3500kg:

- Unique and industry-leading riveted beam connector design
- Evenly distributed load per level

Accessories:

- Galvanised shelves
- Timber decking
- Pallet support bars
- Fork entry bars
- Anti-collapse mesh
- Column upright and rack end protection

Other racking options:

- Drive-in
- Live Storage
- Cantilever
- Vertical
- Cable & Coil
